German expert releases Hanoi photo book

(Cinet)- A German specialist has launched a photo book on the history, culture and urban development of Hanoi in Vietnamese, English and his mother tongue.

Dr. Michael Waibel introduced his book titled "Ha Noi Capital City" during a launch ceremony at the Goethe-Institut in the Vietnamese capital city .

The author is currently lecturing and doing research on urban development at the Institute of Geography under Hamburg University in Germany.

The book comes in a large size and its annotations are provided in Vietnamese, English, and German.

It features 600 photos which accentuate the capital's millennium-old history, rich culture, and multifaceted lifestyle.

The photos include those offering aerial views of the city and close-ups of its age-old architectural and cultural icons.

The book also highlights the seamless combination between time-honored values and modernity, and underlines Hanoi's and its residents' striking changes over the course of time.

"Ha Noi Capital City," which is Waibel's second work on Vietnamese metropolises, also encompasses several writings by locals and reflects the challenges regarding sustainable development the capital and its residents have faced.
